Aviolinks®

ETH/USB

- Supports a wide range of avionic protocols with up to 3 modules
 - **MIL-STD-1553:** 1 channel dual-redundant interface per module, configurable for single or multi-function operation, with selectable direct or transformer coupling
 - **ARINC-429:** data transmission and reception capabilities with a balanced configuration of 2 TX and 4 RX channels per module
 - **ARINC-825:** 2 channels per module
 - **Avionic Discrete:** 8 discrete channels per module
- IRIG B time decoder (up to 4.5 V)
- RS-485 interface (20 Mb/s)
- 4 discrete I/O (TTL)
- Ethernet port (10/100/1000)
- USB 2.0 port (Type-C)
- Power input: USB Type-C (5 V - 15 W)
